From: Dr. Kamal Abdou Youssef
37 Str. El Asr El Aini (apt. 5)
Cairo/Egypt

Dec. 7, 1968

Dear Sir:

I devoted many of the best years of my life for the practical study of the bacterial nucleus and I wrote three unpublished articles on the bacterial nucleus (and delivered orally in front of three scientific societies namely the Asr El Aini clinical society, the Abbassia fever hospital clinical society (with the attendance of NAMRU 3 personnel) and the Bacteriology Institution of Karolinska Institutet, Stockholm, Sweden eleven years ago). My work look contradictory to what is generally accepted in this field although I believe that in essence there is no such contradiction but only my work I believe is more elaborate and precise. I would appreciate very much to have your opinion in my work which I will send to you as soon as I receive a notice from you. Awaiting your news, thanking you in advance for your kindness, I remain dear Sir,

Sincerely yours,

K.A. Youssef

(Research worker)
